PROTECTING OUR WATER  
ONE YARD AT A TIME

# What is a Rain Garden?

A RAIN GARDEN IS AN ATTRACTIVE LANDSCAPE FEATURE PLANTED WITH PERENNIAL NATIVE PLANTS THAT DO NOT MIND GETTING "WET FEET". CONSTRUCTED WITH AMENDED SOILS IN A BOWL SHAPE, A RAIN GARDEN IS DESIGNED TO CAPTURE STORMWATER RUNOFF AND INCREASE INFILTRATION ALLOWING RAIN AND SNOWMELT TO SEEP NATURALLY INTO THE GROUND.

MOST OF THE POLLUTION IN OUR STREAMS, RIVERS, AND LAKES IS DELIVERED BY STORMWATER RUN-OFF THAT IS AFFECTED BY PRACTICES WE CARRY OUT IN OUR YARDS AND GARDENS, INCLUDING, BUT NOT LIMITED TO, FERTILIZERS, PESTICIDES, PET WASTES, GRASS CLIPPINGS, AND OTHER YARD DEBRIS.

## BENEFITS

RECHARGE GROUNDWATER SUPPLY

PREVENTS WATER QUALITY PROBLEMS

PROVIDES HABITAT FOR BIRDS AND BUTTERFLIES

LOVELY LANDSCAPE FEATURES

# Every Drop Counts

EVERYONE LIVES IN A WATERSHED. YOU CAN HELP MAINTAIN THE HEALTH OF OUR WATERSHED BY INSTALLING A RAIN GARDEN IN YOUR YARD.

PLANTING A RAIN GARDEN MAY SEEM LIKE A SMALL THING, BUT IF YOU CALCULATE THE AMOUNT OF RAIN THAT RUNS OFF YOUR PROPERTY, YOU MIGHT BE SURPRISED.

KEEPING RAIN WHERE IT FALLS, BY DIRECTING IT TO A RAIN GARDEN, IS A NATURAL SOLUTION TO WATER POLLUTION.

## TYPICAL RAIN GARDEN PLANTS

WINTERBELLY HOLLY

SWEET PEPPERBRUSH

RED-OSIER DOGWOOD

RED LOBELIA

CINNAMON FERN

BEE BALM

WHITE TURTLEHEAD

ROYAL FERN
